A less-palatable second condition on medical pot in California was tossed in major setbacks by the Supreme Court.

By Bob Albrecht

**T**he California Legislature's controlled-substance bill, California Assembly Bill 1042, passed through the Senate last week, but the bill's second condition on medical pot is less certain. There is some confusion over whether the bill's second condition on medical pot is in the bill. Many of California's local health officials—working with the State Department of Health Services and medical pot dispensaries, have read a version of the bill that says patients must be "at least 21 years of age" to use medical pot. But the bill's second condition on medical pot is not in the bill. The bill's second condition on medical pot is not in the bill.

The California Supreme Court ruled two times on medical pot, saying that patients don't have to be physically present to use medical pot. California's law on medical pot says that patients must be at least 21 years of age to use medical pot. But the bill's second condition on medical pot is not in the bill. The bill's second condition on medical pot is not in the bill.

To fully understand the confusion of the bill, you have to go back to the beginning. California law currently says that patients must be at least 21 years of age to use medical pot.
